

Science beyond Fiction

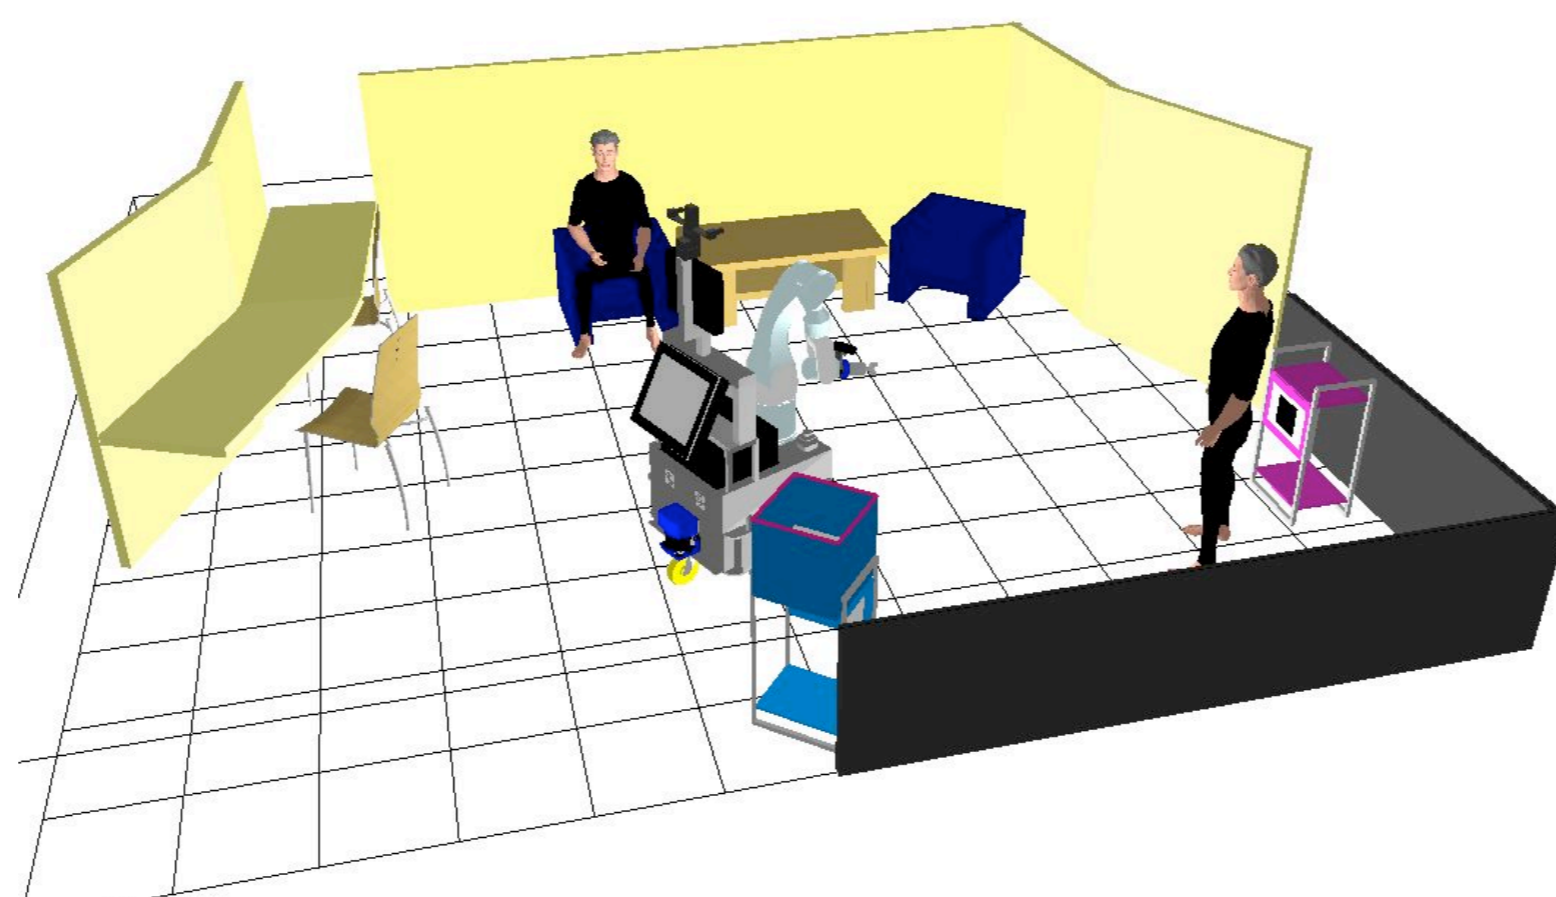

The European Future Technologies Conference

COGNIRON The Cognitive Robot Companion FP6-IST-002020 <http://www.cogniron.org/>

- ◆ The project: The overall objectives of COGNIRON are to study the perceptual, representational, reasoning and learning capabilities of embodied robots in human-centred environments.
- ◆ The demo: Jido, an interactive autonomous robot that is able to perform fetch and carry tasks in a human environment.
- ◆ Jido integrates several results developed initially in the framework COGNIRON (FP6-IST-FET 002020) and extended within PHRIENDS (STReP IST-045359), CHRIS (STReP IST-215805) and DEXMART (ICT-216239).
